

PROFESSIONAL SUMMARY

Full-Stack Engineer with 9+ years building web, mobile, and AI products. Led engineering teams and built systems serving 700K+ paying subscribers at DribbleUp and supporting \$20M in annual revenue at Budee.

EXPERIENCE

SIRO *Software Engineer*

Manhattan, NY | **June 2026 - Present**

- Built AI sales roleplay features across Node.js APIs, Next.js manager tools, and React Native practice screens, connecting training assignments, attempt reviews, and performance tracking
- Developed tenant-isolated MCP tools backed by roleplay data services, enabling reps and managers to query progress, pass rates, and transcript evidence through AI chat
- Built assignment and attempt APIs and connected them to web and mobile interfaces, including review filters, due dates, and attempts-to-first-pass reporting
- Implemented assignment notifications and scheduled reminders, plus a reusable bulk push pipeline with recipient deduplication and retry-safe writes

EXPYS *Lead Software Engineer*

Manhattan, NY - Remote | **March 2025 - April 2026**

- Architected a multi-tenant SaaS platform with Next.js, React, and Node.js for CRM, inventory, and product releases, plus a React Native loyalty app on shared backend services
- Built real-time AI chat with PostgreSQL and WebSocket streaming, and an AWS S3/CloudFront content pipeline with automated image optimization
- Developed custom MCP integrations and AI-assisted TDD workflows, reducing manual work by 80% and enabling 30% faster feature releases

DRIBBLEUP *Lead Software Engineer*

Irvington, NY | **April 2022 - March 2025**

- Delivered features from Django APIs to React Native clients for a platform serving 700K+ paying subscribers and generating \$50M in annual gross revenue
- Built and scaled Django services for authentication, payments, admin/CMS tools, and Celery data pipelines supporting mobile and connected-device apps
- Built commerce, social, and competition features across REST endpoints, data persistence, and UI, plus integrations for four smart exercise equipment platforms
- Implemented automated E2E testing and reduced native build times by 88% (60 to 7 minutes) to accelerate releases

BUDEE INC. *Lead Software Engineer*

Los Angeles, CA | **July 2019 - April 2022**

- Architected React storefronts, React Native customer and driver apps, and Node.js services supporting \$20M in annual revenue across 300K+ orders and 10+ sales channels
- Led 4 engineers from concept through production and designed self-learning inventory and zoning-based driver-routing systems
- Reduced server hosting costs by 95% through infrastructure optimization and CPU-based auto-scaling

PAYPAL *Software Engineer*

Scottsdale, AZ | **July 2017 - March 2019**

Site Stability Engineering | Core Platforms & Infrastructures

- Owned an internal query assistant used by 2,000+ engineers weekly, adding 2FA and optimizing for 30-second database recovery
- Built VM remediation tooling that enabled self-healing infrastructure and saved \$5-10M annually, plus a Python data-quality app for operational decisions

EDUCATION

ARIZONA STATE UNIVERSITY *Bachelor of Science, Computer Science*
