

PROFESSIONAL SUMMARY

Lead Full-Stack Engineer with 8+ years shipping end-to-end web and mobile applications across enterprise, e-commerce, and SaaS platforms. Proven track record building production systems from React and Next.js front-ends to Node.js and Python services on PostgreSQL and AWS. Deep expertise in TypeScript, React Native, system design, and AI/LLM integration.

EXPERIENCE

EXPYS *Lead Software Engineer*

Manhattan, NY - Remote | **March 2025 - April 2026**

- Architected a multi-tenant SaaS platform with Next.js, React, and Node.js, featuring CRM, inventory management, product drip releases, and Generative AI for recommendations, copywriting, and customer support
- Engineered a real-time AI-powered chat system on PostgreSQL with WebSocket streaming, driving improved conversion rates
- Built a React Native loyalty app for enterprise clients on shared backend services, enabling exclusive booking of luxury travel and products
- Orchestrated a global content delivery pipeline using AWS S3 and CloudFront with automated image optimization
- Developed custom MCP integrations powering personalized AI-driven workflows and analytics, reducing manual work by 80%
- Implemented AI-assisted test-driven development across the SDLC, increasing engineering efficiency by 30%

DRIBBLEUP *Lead Software Engineer*

Irvington, NY | **April 2022 - March 2025**

- Drove application development for a platform generating \$50M in gross revenue, owning end-to-end delivery from API design to client implementation
- Built and scaled a Django backend powering the platform — REST APIs for mobile clients, admin/CMS tooling, auth and payments, business logic, and Celery-based data pipelines
- Built cross-stack integrations for 4 smart exercise equipment platforms (Tennis, Baseball, Trampoline, Weights), spanning device APIs, backend services, and React Native clients
- Authored full-stack features end-to-end — Item Shop, Friends Feed, Daily Challenge, Versus Mode, and Micro-Leaderboard — including REST endpoints, persistence, and UI
- Implemented automated end-to-end testing framework, reducing regression defects and improving release confidence
- Reduced native build times by 88% (60 min to 7 min), accelerating release cycles and developer productivity

BUDEE INC. *Lead Software Engineer*

Los Angeles, CA | **July 2019 - April 2022**

- Architected a full-stack e-commerce ecosystem — Budee App, Driver app (React Native), Storefront (React), Brand Plugin (React), and Node.js server — driving \$20M annual revenue across 300K+ orders and 10+ sales channels
- Designed a self-learning inventory algorithm and architected a zoning-based routing system matching orders to optimal drivers
- Reduced server hosting costs by 95% through infrastructure optimization and CPU-based auto-scaling

PAYPAL *Software Engineer*

Scottsdale, AZ | **July 2017 - March 2019**

Site Stability Engineering | Core Platforms & Infrastructures

- Owned an internal query assistant used by 2,000+ engineers weekly, implementing 2FA and optimizing for 30-second database recovery
- Developed a VM remediation front-end enabling self-healing infrastructure, reducing downtime and saving \$5-10M annually
- Built a Python-based data quality app integrating ticketing data with visualizations for data-driven decisions

PROJECTS

AVI *Cofounder / CTO*

New York, NY | **December 2023 - January 2025**

- Led full-stack development of a GDS flight booking platform for iOS and Android; pivoted to a flight tracking app rewarding users for disruptions

EDUCATION

ARIZONA STATE UNIVERSITY *Bachelor of Science, Computer Science*
