

PROFESSIONAL SUMMARY

Lead Software Engineer with 8+ years of experience leading engineering teams and architecting high-impact web and mobile applications across enterprise, e-commerce, and SaaS platforms. Proven track record driving technical roadmaps and building scalable, high-traffic systems. Deep expertise in React, React Native, TypeScript, Node.js, Python, Django, and AWS.

EXPERIENCE

EXPYS *Lead Software Engineer*

Manhattan, NY - Remote | **March 2025 - April 2026**

- Architected a React Native loyalty app for enterprise clients, enabling exclusive booking of luxury travel and products
- Developed a multi-tenant SaaS admin portal with Next.js and React, featuring CRM, inventory management, product drip releases, and Generative AI for recommendations, copywriting, and customer support
- Orchestrated a global content delivery pipeline using AWS S3 and CloudFront with automated image optimization
- Engineered a real-time AI-powered chat system on PostgreSQL, driving improved conversion rates
- Implemented AI-assisted test-driven development across the SDLC, increasing engineering efficiency by 30%
- Developed custom MCP integrations powering personalized AI-driven workflows and analytics, reducing manual work by 80%

DRIBBLEUP *Lead Software Engineer*

Irvington, NY | **April 2022 - March 2025**

- Led cross-platform mobile and connected device apps in React Native serving 700K+ subscribers across iOS, Android, Chromecast, Fire TV, Apple Watch, and Vision Pro
- Drove application development for a platform generating \$50M in gross revenue
- Built and scaled a Django backend powering the platform — REST APIs for mobile clients, admin/CMS tooling, auth and payments, business logic, and Celery-based data pipelines
- Reduced native build times by 88% (60 min to 7 min), accelerating release cycles and developer productivity
- Pioneered integration of 4 smart exercise equipment platforms (Tennis, Baseball, Trampoline, Weights)
- Implemented automated end-to-end testing framework, reducing regression defects and improving release confidence
- Authored high-engagement features: Item Shop, Friends Feed, Daily Challenge, Versus Mode, and Micro-Leaderboard

BUDEE INC. *Lead Software Engineer*

Los Angeles, CA | **July 2019 - April 2022**

- Architected a full-stack e-commerce ecosystem — Budee App, Driver app (React Native), Storefront (React), Brand Plugin (React), and Node.js server — driving \$20M annual revenue across 300K+ orders and 10+ sales channels
- Reduced server hosting costs by 95% through infrastructure optimization and CPU-based auto-scaling
- Led a team of 4 engineers, driving engineering roadmap and technical strategy from concept through production delivery
- Designed a self-learning inventory algorithm and architected a zoning-based routing system matching orders to optimal drivers

PAYPAL *Software Engineer*

Scottsdale, AZ | **July 2017 - March 2019**

Site Stability Engineering | Core Platforms & Infrastructures

- Owned an internal query assistant used by 2,000+ engineers weekly, implementing 2FA and optimizing for 30-second database recovery
- Developed a VM remediation front-end enabling self-healing infrastructure, reducing downtime and saving \$5-10M annually
- Built a Python-based data quality app integrating ticketing data with visualizations for data-driven decisions

PROJECTS

AVI *Cofounder / CTO*

New York, NY | **December 2023 - January 2025**

- Led full-stack development of a GDS flight booking platform for iOS and Android; pivoted to a flight tracking app rewarding users for disruptions

EDUCATION

ARIZONA STATE UNIVERSITY *Bachelor of Science, Computer Science*
