

PROFESSIONAL SUMMARY

Mobile Engineer with 9+ years in software engineering, specializing in React Native, iOS, and Android. Led development of apps serving 700K+ paying subscribers at DribbleUp, with experience in native audio, connected devices, and mobile release automation.

EXPERIENCE

SIRO *Software Engineer*

Manhattan, NY | **June 2026 - Present**

- Improved recording reliability with iOS audio-session recovery and Android process isolation, addressing silent recordings and interruptions caused by main-app termination
- Migrated a multi-tenant iOS and Android app to React Native's New Architecture, upgrading Expo, React, and native dependencies while preserving recording, calling, and offline workflows
- Built React Native sales roleplay features with voice sessions, live transcripts, assignment lists, and attempt reviews, enabling reps to practice and review sales conversations
- Automated mobile regression tests with Maestro and GitHub Actions across authentication, recording, playback, and coaching workflows
- Built on-demand React Native Web previews with staging data, enabling browser-based review of mobile UI changes before device testing

EXPYS *Lead Software Engineer*

Manhattan, NY - Remote | **March 2025 - April 2026**

- Architected a React Native loyalty app for enterprise clients, enabling exclusive booking of luxury travel and products through shared backend services
- Built a real-time AI chat system on PostgreSQL and an AWS S3/CloudFront delivery pipeline with automated image optimization
- Drove team adoption of AI coding tools for feature development and debugging

DRIBBLEUP *Lead Software Engineer*

Irvington, NY | **April 2022 - March 2025**

- Led development of React Native and connected-device apps serving 700K+ paying subscribers across iOS, Android, Chromecast, Fire TV, Apple Watch, and Vision Pro
- Integrated four smart exercise equipment platforms—Tennis, Baseball, Trampoline, and Weights—across device APIs, backend services, and React Native clients
- Shipped mobile commerce, social feeds, daily challenges, and competitive game modes for a platform generating \$50M in annual gross revenue
- Reduced native build times by 88% (60 to 7 minutes) and implemented automated E2E testing to accelerate releases

BUDEE INC. *Lead Software Engineer*

Los Angeles, CA | **July 2019 - April 2022**

- Built React Native customer and driver apps within an e-commerce ecosystem generating \$20M in annual revenue across 300K+ orders and 10+ sales channels
- Led a team of 4 engineers, owning the engineering roadmap and delivery from concept through production
- Designed inventory and driver-routing systems and reduced server hosting costs by 95% through infrastructure optimization

PAYPAL *Software Engineer*

Scottsdale, AZ | **July 2017 - March 2019**

Site Stability Engineering | Core Platforms & Infrastructures

- Owned an internal query assistant used by 2,000+ engineers weekly, adding 2FA and optimizing for 30-second database recovery
- Built VM remediation tooling that enabled self-healing infrastructure and saved \$5-10M annually, plus a Python data-quality app for operational decisions

EDUCATION

ARIZONA STATE UNIVERSITY *Bachelor of Science, Computer Science*
